Nationality Pakistani · **Location** Lahore, Pakistan · **Relocation** Open to relocation and remote · **Notice** 30 days

Profile

Full stack software engineer with 3 years of professional experience and **30+ projects shipped** for **10+ clients**, employers and my own products: Python and FastAPI services, PostgreSQL data models and React and TypeScript interfaces, deployed on Docker, Vercel and Railway. Increasingly building **production-grade AI features** into those products on the Anthropic Claude API: agentic pipelines, RAG, structured output with validation, guardrails and cost control.

Professional Experience

Intagleo Systems

Jul 2024 – Present

Software Engineer (Full Stack, Python)

Lahore, Pakistan

- Ship secure **REST APIs in FastAPI and Django/DRF** across several production apps: auth and RBAC, Pydantic validation, background jobs and business logic; cut a Django email workflow from 10–15 s to **under 5 s**.
- Deliver full-stack features with **React and Next.js**, real-time **WebSocket** chat and notifications, and data models across **PostgreSQL**, **MySQL** and **MongoDB**.
- Build **LLM-powered features on the Anthropic Claude API**: agentic workflows, RAG pipelines and MCP-connected tooling, with structured outputs, schema validation and deterministic fallbacks so AI features fail safely.
- Built an **agentic design-to-layout workflow over MCP** (Jira, Figma, Chrome DevTools) for menu boards used by national restaurant chains, turning a multi-day manual build into a reviewable pass; automate internal workflows in an Agile team.

Devsloop

Jul 2023 – Jun 2024

Associate Software Engineer

Lahore, Pakistan

- Delivered full-stack features for client web apps, **FastAPI** and Django REST endpoints with **React** front ends, from ticket to deployment, including **MySQL** and **PostgreSQL** schema changes, query tuning and bug triage.

Wisdom Software House

Jan 2023 – Jun 2023

Software Developer Intern

Lahore, Pakistan

- Built full-stack web applications with a **FastAPI** backend and React front end, and optimised **MySQL** queries for performance.

Selected Projects · more at arslantabish.com

Cold Outreach Pipeline: AI Lead-Generation SaaS

Python, FastAPI, Claude, PostgreSQL, Stripe

- Multi-tenant SaaS with a **9-stage resumable pipeline**, Stripe billing, encrypted BYOK keys and a validated structured-output layer; guardrails, caching and routing cut LLM spend by **60%**.

Khaayaal: Elder-Care Platform

TanStack Start, React 19, TypeScript, Tailwind v4

- Six-route client site on a custom design-token system, with a **3D React Three Fiber hero**, scroll animation and an interactive pricing calculator; React Hook Form + Zod, on Vercel.

Leads In The Pipe: B2B Agency Website

React 18, TypeScript, Framer Motion, FastAPI

- Figma to production on Vite + React + TypeScript with a **FastAPI serverless API**; Vitest, React Testing Library and a **WCAG 2.1 AA** pass, plus SEO and Core Web Vitals work.

DocPilot: Enterprise RAG over Private Documents

Python, FastAPI, PostgreSQL + pgvector, Claude

- Permission-aware assistant on **hybrid retrieval** (pgvector + full-text, rank fusion, reranking) with ACLs compiled into SQL, validated citations and a **CI eval gate**; 82 unit tests.

Technical Skills

Backend: Python 3.12+, FastAPI, Django & DRF, Pydantic v2, SQLAlchemy 2.0, REST APIs, WebSockets, background jobs, auth & RBAC

Frontend: TypeScript, React 18 & 19, Next.js, Vite, TanStack, Tailwind CSS, shadcn, Framer Motion, React Hook Form, Zod

Databases: PostgreSQL (pgvector, full-text, RLS), MySQL, MongoDB · schema design, migrations, query tuning

AI & LLMs: Claude & OpenAI APIs, LangGraph, LangChain, MCP, RAG, embeddings, structured outputs, evals, OpenCV

DevOps & Testing: Docker, Vercel, Railway, AWS S3, Cloudflare, GitHub, CI/CD, pytest, Vitest, React Testing Library

Education & Certifications

University of the Punjab, Lahore, BSc Computer Science (BSCS)

2020 – 2024

Certifications: Claude Code 101 (Anthropic) · Python for FastAPI: Advanced Backend · Python for Computer Vision & Deep Learning (Udemy)

Awards: Battle Byte Programming Competition, Runner-Up · **Languages:** English (fluent) · Urdu (native) · Punjabi (native)
